### SUMMARY

Computer and software enthusiast who am eager to learn new things. I like to solve problems and I am open to new challenges. In my spare time, I do Crossfit and other sports related to that sport.

### SKILLS

Problem solving and project management. Team work and initiation are my strong suits. I have a good understanding of basic electronics and electrical-related issues.

## WORK

### PRODUCT ASSEMBLY LINE / BEAMEX OY

01/2014 – 08/2015

My tasks included tracking and correcting defected units on the assembly line, problem-solving and soldering of components. I also worked alongside the development team.

### SUMMER JOB / UPM-KYMMENE OYJ

05/2016 – 08/2016 and 05/2017 – 08/2017

For two summers I have worked at UPM-Kymmene in the automation maintenance department. My tasks included changing air valves and their actuators, repairing broken components and conducting weekly maintenance.

## EDUCATION

### COMPUTER ENGINEER / ONGOING

Åbo Akademi University

From 2017 I study in the field of computer engineering. In the first two years of studying we have learned programming in Java, and some in C/C++, the basic algorithms and compiling effective sorting algorithms.

### ELECTRONICS ASSEMBLY / 2013

Optima Jakobstad – vocational school

Received good basic knowledge of electronics and small circuits. Mastered the use of Office programs, different computer components and telecommunication networks.

## ORGANIZATIONS

This year (2018) I am the vice chairman of our student association. In our association, we learn to listen to each other and to work as a group. Moreover, we plan events and keep close contact with our industry.
